Bucharest, Romania

Profile

Ambitious Business Analyst with a degree in Business Engineering from Maastricht University and 6 months of experience in data management and process optimization. Skilled at bridging the gap between technical and non-technical domains to ensure precise requirements and fulfill stakeholder requirements.

Professional Experience

09/2023 – 02/2024
Bucharest, Romania

Business Analyst
Global Archives Management

- Designed a line optimization model that increased the document processing efficiency by 15%.
- Advised non-technical users on how to best leverage existing and available digital archiving technology.
- Created Excel-based BI templates and dashboards that enhanced reporting efficiency.
- Supported compliance and regulatory requirements by validating metadata and documentation for over 1,200 archived files, ensuring audit readiness.
- Managed sprints and epics in Jira; grooming the backlog and refining the Roadmap.

Education

07/2025
Maastricht,
Netherlands

Business & Engineering
Maastircht University

- Performed extensive T-SQL development, profiling, and reporting during projects.
- Trained on Jira, Agile mindset, and high-level SCRUM methodology.
- Developed a working knowledge of supply chain management and systems/process engineering through projects.
- Engineering training provided strong quantitative, analytical, and systems-thinking abilities, complementing business studies in finance, strategy, and organizational management.
